**INTELLI-CHECK and EasyLobby Sign Strategic Partnering Agreement
Will Jointly Market Integrated Technologies for Government and Commercial Visitor
Management and Security Applications**

WOODBURY, NY and NEEDHAM, MA – May 4, 2004 – Intelli-Check Inc. (AMEX:IDN), a leader in advanced identification verification systems, and **EasyLobby, Inc.**, a global provider of comprehensive visitor management systems, announced today that the companies will partner to jointly market a state-of-the-art automated system that in one step verifies the most often used form of identification – a driver license – and quickly and accurately processes that information for visitor management and lobby security applications.

“We believe that the need for electronic verification of identification documents for in-person proofing is rapidly gaining traction in industry and government circles, particularly at high-profile infrastructure, where the threat of terrorist acts remains an unfortunate factor of daily life,” said Frank Mandelbaum, Chairman and Chief Executive Officer of Intelli-Check. “We are pleased that EasyLobby has chosen to integrate our technology into their visitor-management system, which affords the user the ability to access two best-of-class solutions in one system. Intelli-Check’s multi-purpose ID-CHECK technology, which can be deployed as a single unit or incorporated into other sophisticated technologies such as that of EasyLobby, is already in use at many major airports and commercial facilities around the country and is playing an increasing role in security efforts,” Mr. Mandelbaum added.

“Demand for secure visitor management systems is growing exponentially. Increasingly, security personnel and facilities managers are realizing that the paper guest log they have in the lobby is inadequate for keeping track of who is in their buildings and why,” said Howard Marson, Chief Executive Officer of EasyLobby. “By combining the speed and ease of use of Intelli-Check’s document verification technology with our secure visitor management and badging software, dozens of our customers have already purchased and are benefiting from this affordable turnkey system that is fast, easy, and convenient for use by receptionists, security personnel and visitors alike. This system is designed to assure that visitors are processed in a professional manner, so that both employees and visitors feel more secure.”

About Intelli-Check, Inc.

Intelli-Check, Inc. is the acknowledged leader in technology that assures the authenticity of driver licenses, state issued non-driver and military identification cards used as proof of identity. Our patented ID-CHECK technology instantly reads, analyzes, and verifies the encoded data in magnetic stripes and barcodes on government-issue IDs from approximately 60 jurisdictions in the U.S. and Canada to determine if the content and format is valid. Applications include:

- **security and access control** at airports, government and commercial buildings, military installations, and other critical sites
- **identity-theft prevention**, where a fake ID is often the primary proof of identity
- **commercial-and government-fraud prevention** to help stem the millions of dollars each year in losses from credit card, check-cashing, bank, insurance, healthcare and pharmacy fraud

(MORE)

Intelli-Check and EasyLobby to Jointly Market Advanced Visitor-Management System

- **age verification**, to protect bars and other retail establishments from the potential fines and penalties associated with selling age-restricted products to minors.
- **increases productivity** and eliminates inefficiencies and inaccuracies associated with manual data entry

The company has been the national testing laboratory for the American Association of Motor Vehicle Administrators (AAMVA) since 1999. The company has access to all the currently encoded driver license formats. For more information, visit www.intellicheck.com.

About EasyLobby

EasyLobby® was founded in 1997 to provide the first comprehensive software solution for electronic visitor management. EasyLobby's suite of products provides complete, fast, and secure visitor registration and pre-registration, recordkeeping, reporting, and badging. In most organizations today, visitors just scribble a name in a paper guest book. With EasyLobby, visitors electronically scan their ID (license, passport, visa, business card, etc.), and all relevant information about them is automatically read and captured in a secure database file, including their photo and/or signature, the name of the person being visited, the reason for the visit, and their entry and exit times. In twenty seconds or less, the person is professionally checked in and a high-quality, customized visitor badge is printed.

With thousands of EasyLobby systems installed and operating globally, EasyLobby has become the world's leading provider of secure visitor management and lobby security solutions to private sector and public sector companies and organizations, from Fortune 500 companies to government agencies, multi-tenant buildings, schools, hospitals and others. For more information visit www.easylobby.com, or call 781-455-8558.
