For Immediate Release

RS2 Technologies and EasyLobby, Inc. Announce Fully Integrated Access Control/Visitor Management Solution and Reseller Agreement

Munster, IN - RS2 Technologies, LLC, a leading provider of access control systems, and EasyLobby®, the industry leader in secure visitor management solutions, have announced the availability of an add-on software module that tightly integrates RS2 Access It® and EasyLobby's SVM (Secure Visitor Management) software. As part of the announcement, RS2 has also become an authorized dealer for the full line of EasyLobby visitor management products, and will be offering the integrated solution to all of its dealers and customers.

With the new integration module, customers using SVM and AccessIt! will be able to issue different levels of card access to visitors, contractors and employees directly from the EasyLobby SVM visitor form. At the time visitors or contractors are checked in or badged using SVM, information about them, the employee being visited, access level to be granted, card number, and expiration date/time is automatically passed from the SVM database to the AccessIt! database, and the card is activated. In addition, when the person is checked out of EasyLobby, AccessIt! is immediately notified and the card is deactivated. Cards do not need to be pre-programmed, and they can be re-used.

"More and more of our customers are requesting this type of integration between our award-winning visitor management system and their access control system," said Howard Marson, CEO of EasyLobby. "The tight integration with AccessIt! allows our joint customers to quickly and easily grant card access to those visitors or contractors that require it, without having to expose the access control system to their guards and receptionists."

RS2 National Sales Manager Gary Staley stated that "This partnership is an exciting development, not just for RS2 and EasyLobby, but primarily for our dealers and customers who have been looking for a way to integrate visitor management into their access control system."

Pricing and Availability

The EasyLobby-RS2 integration module, plus EasyLobby's full suite of visitor management and web pre-registration software, and a broad array of value-added

peripherals (passport/license/business scanners and readers, badge printers, cameras, signature pads, barcode scanners, card readers, etc.) are available immediately from both RS2 and EasyLobby, or any of their respective dealers worldwide.

About EasyLobby

EasyLobby® was founded in 1997 to provide the first comprehensive software solution for electronic visitor management. EasyLobby's suite of products provides complete, fast, and secure visitor registration, web-based pre-registration, management, reporting and badge printing.

With thousands of EasyLobby systems installed and operating globally, EasyLobby is the world's leading provider of secure visitor management solutions to private sector and public sector companies and organizations, from Fortune 500 companies to government agencies, multi-tenant office buildings, hospitals, universities, K-12 schools and gated communities.
