

PRESS RELEASE

EASYLOBBY PARTNERS WITH eCUSTOMS FOR RESTRICTED PARTY SCREENING TO STRENGTHEN BUILDING SECURITY

July 10, 2006

Buffalo, N.Y. EasyLobby, Inc., the global leader in secure visitor management systems, has partnered with MSR eCustoms to enhance its building security software system with real-time, online background checks to identify individuals that may pose a security threat.

eCustoms is a leading provider of automated systems that help international companies comply with global customs laws and regulations. One component of these solutions is a tool that screens names against databases of people who are categorized by the Government as a Restricted Party, and therefore a security threat.

When a visitor's ID (passport, license or business card) is scanned by an EasyLobby system, the name (and license number or other data) is automatically passed to eCustoms' online screening solution, where it is checked against up to 50 different government-maintained Restricted Party databases. Any matches are then displayed to the guard or receptionist, who with "one click" can then drill down to see the detailed government record on the person and decide whether to let him or her enter the facility.

"For many years we have had a Watch List feature in our visitor management system to alert customers about unwanted visitors. Traditionally, our customers have used the Watch List feature to stop ex-employees, estranged spouses, and the like from entering their facilities" said EasyLobby CEO Howard Marson. "With the integration of eCustoms' Restricted Party Screening solution, we are now able to extend the Watch List concept to identify and bar entry to individuals who appear on any one of the government's Restricted Party lists, in real time, and without having to periodically download those lists into our own database."

eCustoms president and CEO Rajiv Manucha said the partnership demonstrated the flexibility and functionality of the company's compliance solutions, including its Restricted Party Screening tool.

"Our solutions are designed to be integrated with many different types of business operations – retail, wholesale, manufacturing – as well as with major ERP systems," said Manucha. "Our screening tool currently helps a wide range of organizations understand who they are doing business with. With the help of EasyLobby, they will also know who they are opening their doors to."

###

About EasyLobby

EasyLobby was founded in 1997 to provide the first comprehensive software solution for electronic visitor management. Its suite of products provides complete, fast, and secure visitor registration, web-based pre-registration, management, reporting and badge printing. Thousands of EasyLobby systems have been installed worldwide in private and

public sector companies and organizations from Fortune 500 companies, government agencies, multi-tenant office buildings, hospital, universities, K-12 schools and gated communities. For more information about EasyLobby, visit: www.EasyLobby.com.

About eCustoms

eCustoms has been delivering automated and integrated international trade solutions for over 25 years, with a focus on technology that helps manage country-specific trade regulations, customs compliance, tariff management and import/export documentation. Solutions include electronic submissions to Customs, NAFTA management, tariff classification, Restricted Party Screening and ECCN and ITAR license determination. In addition, eCustoms offers brokerage services and other customs consulting services, including support for managing domestic and international customs processes. For companies who want to maintain their competitive edge, the smart choice is to integrate eCustoms' suite of trade applications, including web-based solutions, into their existing IT infrastructure. For more information about eCustoms and its compliance solutions, visit: www.ecustoms.com.
